

Aim : To know that the two ends of a magnet are called the north and south poles.

To know that like poles repel and opposite poles attract.

NameDate.....

Lets investigate with magnets!
Try putting the magnets close to each other.
Complete the table.

Poles	What happens
N and N	
N and S	
S and S	

Complete these sentences.

The two ends of a magnet are called the (north/east) and (west/south) poles.

If two north poles are close together they will (attract/repel) each other.

A north and south pole will (attract/repel) each other.
